

ATKINSON CENTER TOPICAL LUNCH ON WATER

April 10, 2018

OBJECTIVE

How can the Cornell water community leverage our collective skills to help policymakers address the 21st Century's looming water crisis?

QUESTIONS FOR DISCUSSION

What policy-relevant water-related research is currently underway across Cornell's schools and departments?

What should be the Atkinson Center's priority areas for collaborative research and policy engagement regarding water?

How can the Atkinson Center better support faculty in their work on water and sustainability?

Regarding policy engagement, which levels of government to focus on (local, state, federal, international institutions)? Should multinational businesses be a focus as well?

What are possible think tanks, NGOs, companies, and other institutions with whom to partner going forward?
