Dear Colleagues,

Many thanks for taking time from your busy schedules to come for lunch today and talk about mycotoxins. It was a great pleasure to meet you and to hear your perspectives. We are even more optimistic than before that we can all learn quickly and effectively by working together in this interdisciplinary group. We look forward to working with you in the near future.

The CCSF request for proposals asks for a brief letter of intent to be submitted by July 1, with a full proposal due by September 5. This is a wonderful opportunity for us to focus our efforts and submit a group project on mycotoxins and sustainability. The RFP can be found at: http://www.sustainablefuture.cornell.edu/attachments/RFP_CCSF_2008.pdf

We will be in contact with again soon to find out if you are interested in participating and to set up another meeting devoted to specific research ideas for this RFP.

Below is a list of participants at lunch today, which we would like to think of as the nucleus of the Cornell Mycotoxin Working Group (CMWG). We hope that you and your students will be interested in participating in an interdisciplinary seminar series in Fall 2008. We envision one session each week throughout the semester, covering a broad range of topics in Agriculture, Health and Social Sciences as they relate to mycotoxins. More information will be coming along this summer.

We're looking forward to interacting more with you soon.

Best wishes,

Michael and Rebecca

Cornell Mycotoxin Working Group

Gary Bergstrom, Plant Pathology & Plant-Microbe Biology gcb3@cornell.edu

Karyn Bischoff, Animal Health Diagnostic Center klb72@cornell.edu

Kathryn Boor, Food Science kjb4@cornell.edu

Dan Brown, Animal Science dlb20@cornell.edu

Heather Clark Dantzker, Sprecher Institute for Comparative Cancer Research hac4@cornell.edu

Vivian Hoffman, Applied Economics and Management veh4@cornell.edu

Paswel Marenya, Applied Economics and Management ppm3@cornell.edu

Chuck Nicholson, Applied Economics and Management cfn1@cornell.edu

Rebecca Nelson, Plant Pathology & Plant-Microbe Biology, and Plant Breeding & Genetics rjn7@cornell.edu

Michael Milgroom, Plant Pathology & Plant-Microbe Biology mgm5@cornell.edu

Interested but could not attend lunch on June 4

Stephen DeGloria, Crop and Soil Science sdd4@cornell.edu

Stephen Kresovich, Vice Provost for Life Sciences, Plant Breeding & Genetics sk20@cornell.edu

Beth Medvecky, CIIFAD bam44@cornell.edu
David Sahn, Nutritional Science David.Sahn@cornell.edu
Rebecca Stoltzfus, Nutritional Science rjs62@cornell.edu

CCSF Leaders at lunch June 4

Chris Barrett, CCSF Associate Director, Economic Development Programs cbb2@cornell.edu
Anurag Agrawal, CCSF Associate Director, Environment Programs aa337@cornell.edu
Dave Dieterich, CCSF Partnerships Director dd355@cornell.edu
Helene Schember, CCSF Executive Director hrs6@cornell.edu
